**DJE - ZINS & DIVIDENDE XP (EUR)****INVESTMENT STRATEGY**

DJE - Zins & Dividende is a multi-asset fund managed independently from any benchmark. The fund aims for absolute returns with the help of conservative drawdown management. On the equity side, the fund invests primarily in equities with above-average dividend yields. The investment objective is to invest across asset classes and generate regular income from fixed income instruments, supplemented by capital gains and dividends on the equity side. The selection criteria for companies are recurring dividend payments as well as investor-friendly corporate policies such as stock buybacks. While the focus is on dividend paying stocks, the fund may also invest in companies that do not currently pay a dividend. The fund's flexible investment approach allows it to adapt quickly to changing market conditions. To reduce volatility, at least 50% of the fund is invested in bonds. Equity exposure fluctuates between 25% and 50%. Currency risks can be hedged opportunistically.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method<sup>2</sup> and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00%, he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

**MONTHLY COMMENTARY**

In March, the equity markets largely continued their bullish trend from the previous months. The rise on the stock markets in the first quarter was driven by good or improving economic data, which turned out better than widely expected. These included continued solid figures from the US labour market, an improving purchasing managers' index for services in the eurozone and fiscal stimulus in China, which should help to achieve the growth target. This turned the initial fears of recession into hope that a soft landing in the major economic regions was still possible. As a result, expectations of interest rate cuts, which were still very high at the beginning of the year, have now shifted to the middle of the year. Especially as consumer prices in the USA rose again in February. The US Federal Reserve therefore remained cautious and intends to wait for further data. In turn, the European Central Bank signalled in March that it might cut interest rates for the first time in June. The DJE - Zins & Dividende rose by 2.41% in this market environment. All sectors of the MSCI World global equity index performed well in March. The energy, financial institutions and basic materials sectors achieved particularly high gains. The lowest gains came from the Consumer Goods & Services, Travel & Leisure and Automotive sectors. The fund benefited in particular from its exposure to the financial services, technology and healthcare sectors. The technology sector benefited from the ongoing boom in artificial intelligence, while selected pharmaceutical companies profited from their well-performing obesity products. On the other hand, the weakest results came from the telecommunications, property and utilities sectors. The latter suffered from higher energy purchase prices, while property companies continued to be burdened by the high interest rate level and the shift in interest rate cut expectations. The fund management adjusted the sector allocation slightly over the course of the month and increased the weighting of the technology, industry and financial services sectors, among others. In return, it reduced the healthcare and utilities sectors, among others. The equity allocation rose from 46.65% to 49.36% as a result of the adjustments. On the bond side, the fund benefited in particular from the lower risk premiums on high-quality corporate bonds and US high-yield bonds. However, high-yield European corporate bonds had a negative impact on performance, as the economic environment in the eurozone is not as stable as in the USA and key interest rates are not expected to be lowered until June - meaning that growth will continue to have to be financed more expensively. The fund management bought a US corporate bond from the technology sector and on the other hand reduced US and EUR government bonds and two corporate bonds from the construction and chemicals sector. As a result, the bond ratio fell from 51.79% to 49.65%. The fund's liquidity fell from 1.57% to 0.99%. At the end of the month, securities denominated in US dollars were partially currency-hedged. The currency hedging of securities denominated in Hong Kong dollars against the US dollar also remained in place.

**Evaluation by MSCI ESG Research**

MSCI ESG Rating (AAA-CCC)	A
ESG Quality Score (0-10)	6.8
Environmental score (0-10)	6.5
Social score (0-10)	5.0
Governance score (0-10)	5.6
ESG Rating compared to Peer Group (100% = best value)	17.35%
Peer Group	Mixed Asset EUR Bal - Global (784 Funds)
ESG Coverage	89.32%
Weighted Average Carbon Intensity (tCO <sub>2</sub> e / \$M sales)	155.01

AAA	13.39%	BB	5.51%
AA	25.91%	B	4.13%
A	30.54%	CCC	0.00%
BBB	9.85%	Not Rated	10.68%

**ESG Rating What it means**

AAA, AA	Leader	The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	Average	The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	Laggard	The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated		Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

**DJE - ZINS & DIVIDENDE XP (EUR)**

**INVESTMENT APPROACH**

The objective of DJE - Zins & Dividende is to generate a steady return – even in volatile markets. On the fixed income side, the fund invests primarily in debt instruments from sovereign issuers and corporates with investment-grade ratings. On the equity side, the fund relies on the established DJE dividend strategy. We believe that dividends can make a strong contribution to performance over time due to the compound interest effect. Time-series analysis shows that only around half of the equity returns are due to capital gains. The other half is attributable to dividends. The fund aims for an above-average dividend yield relative to the broader market. However, the fund may also include stocks that do not currently pay a dividend. The asset allocation is flexible and is adjusted depending on market environment. To reduce volatility, at least 50% of the fund are invested in bonds. Equity exposure fluctuates between 25% and 50%. Currency risks can be hedged opportunistically.

**FLEXIBLE ASSET ALLOCATION**

Source: DJE Kapital AG. For illustrative purposes only.

**OPPORTUNITIES AND RISKS**

**Opportunities**

- + The portfolio is continuously adjusted to the changing market environments.
- + Possible share price gains are complemented by interest income from international bonds and dividend distributions.
- + The balanced fund aims for a steady positive performance with low volatility in all market environments.
- + Regular returns from interest and dividends can serve as a buffer in the event of stock market slumps.

**Risks**

- There is a currency risk for euro investors in securities not denominated in euros.
- The value of an investment may rise or fall and investors may not get back the amount invested.
- The income from interest and dividends is not guaranteed.
- Bonds are subject to price risks if interest rates rise, as well as country risks and the creditworthiness and liquidity risks of their issuers.
- Share prices can fluctuate relatively strongly due to market, currency and individual value factors.

**DJE Kapital AG**

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".
