Investment Strategy

The investment focus of DJE - Mittelstand & Innovation is on high-growth, small- and mid-cap equities from Germany, Austria, and Switzerland. The diversification between structural, cyclical, and potential growth opportunities aims to deliver attractive risk-adjusted returns by investing in innovative niche players and "hidden champions". The fund invests in a diversified portfolio of 50-80 equities identified through a disciplined fundamental analysis of the companies. DJE - Mittelstand & Innovation is an innovative investment solution for investors that are looking for a growth fund with an attractive risk-reward profile.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 5.00% , he has to spend a one-off amount of Euro 50.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

Evaluation by MSCI ESG Research

MSCI ESG Rating (AAA-CCC)	A
ESG Quality Score (0-10)	6.8
Environmental score (0-10)	5.4
Social score (0-10)	4.8
Governance score (0-10)	6.5
ESG Rating compared to Peer Group (100% = best value)	14.42%
Peer Group	Equity Europe Sm&Mid Cap (215 Funds)
ESG Coverage	77.04%
Weighted Average Carbon Intensity (tCO ₂ e / \$M sales)	43.70

AAA	10.82%	BB	5.56%
AA	20.43%	B	0.00%
A	28.67%	CCC	0.00%
BBB	11.57%	Not Rated	22.96%

ESG Rating What it means

AAA, AA	Leader: The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	Average: The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	Laggard: The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

Information on the sustainability-relevant aspects of the funds can be found at www.dje.de/en-de/company/about-us/Invest-sustainably/

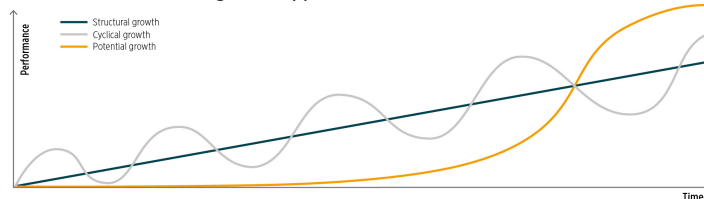

Investment Approach

The fund focuses on high-growth and innovative companies ("hidden champions") in the DACH region (Germany, Austria, and Switzerland). In terms of market capitalisation, the fund mainly invests in small- and mid-cap companies. We have an active bottom-up approach that primarily focuses on fundamental analysis of the companies. The fund invests in equities with high, sustainable, and stable earnings growth. The aim is an attractive risk-reward profile with low maximum drawdown and low volatility.

Portfolio structure

Model illustration of the growth opportunities

Source: DJE Kapital AG. For illustrative purposes only.

Opportunities

- + Small and medium-sized companies usually have a higher growth potential than large corporations.
- + With over 1,500 companies, the German-speaking region is the core region of the "hidden champions" (unknown market leaders).
- + The Mittelstand is the innovation, technology and economic engine of the D-A-CH region.
- + The D-A-CH region is characterised by a stable domestic economy, high legal security and export strength, spread across many sectors.

Risks

- Share prices can fluctuate relatively strongly due to market, currency and individual value factors.
- Small and medium-sized companies are traded less on the stock exchanges than large corporations. Their share prices can therefore fluctuate more than those of large companies.
- In addition to market price risks (equity, interest rate and currency risks), there are country and creditworthiness risks, e.g. a recession of the European economies.

Fund Manager

Philipp Stumpfegger

Responsible Since 10/01/2022

Philipp Stumpfegger has been an analyst and portfolio manager at DJE since September 2021. He is responsible for analysing the industrial and automotive sectors and has managed the DJE - Mittelstand & Innovation fund since October 2022. The economist began his investment career in 2009.

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

Monthly Commentary

The European stock markets had a volatile start to August. Weak US labour market data at the beginning of the month gave rise to fears that the USA could slide into recession. In addition, a (moderate) key interest rate hike by the Bank of Japan jeopardised the usual interest rate differential business, the so-called yen carry trade. As a result, the Japanese share index Topix suffered a daily loss of -12.2%. The European stock markets also felt the impact and fell, albeit not as sharply. The situation calmed down again with better US economic data and a confirmation of interest rate cut expectations from the US Federal Reserve. In Europe, a positive signal came from the combined purchasing managers' index for services and manufacturing. This rose to 51.2 points in August (previous month: 50.2). This puts the index above the threshold value of 50 and signals a slightly expansive economy. However, the increase is solely attributable to the services component. As inflation in the eurozone fell to 2.2% in August (previous month: 2.6%), the markets are also anticipating a further interest rate cut by the European Central Bank. Against this market backdrop, the DJE - Mittelstand & Innovation fell by -2.62%. At sector level, the picture within the European investment region was positive in August. The best performing sectors in relative terms were telecommunications (overweight in the fund), healthcare (overweight in the fund) and energy (underweight in the fund). On the other hand, the consumer discretionary (underweight in the fund), financial services (underweight in the fund) and technology (overweight in the fund) sectors were particularly disappointing. Overall, the sector weighting had a positive effect on the fund's price performance relative to the benchmark index. At individual stock level, the highest performance contributions came from LEG Immobilien, CTRS Eventim and TAG Immobilien (all Germany). By contrast, Bilfinger, Nexus and Mensch und Maschine in particular had a negative impact. The fund management adjusted the allocation over the course of the month: The overweight in the chemicals sector was increased. The overweight in the travel and leisure, media and technology sectors was reduced. The underweight was reduced in the drugstores & grocery shops, food & beverages and retail sectors. The underweight was increased in the commodities and industrial goods & services sectors. The equity allocation rose from 94.69% to 98.52% as a result of the adjustments.
