Investment Strategy

The DWS Concept DJE Responsible Invest is a balanced fund that invests worldwide in equities (min. 25%) and bonds of sustainable companies (green bonds). Companies that exert a positive influence on society through products, processes or special commitment are considered sustainable. In addition, the fund may only invest in companies whose CO2 emissions are below very strict limits. This CO2 filter manifests itself in a very low carbon footprint at fund level. Investments in green bonds are bonds whose proceeds flow into pre-defined green projects - these can include reforestation projects, the establishment of recycling cycles or the improvement of drinking water treatment. The fund is fully geared to globally valid sustainability requirements.

Performance in % since inception (07/04/2004)

The DWS Concept DJE Responsible Invest pursues the same investment objectives, investment process and asset allocation strategy as the DJE - Concept 75, which was first launched on 07.04.2004. On 01.07.2019, the DJE - Concept 75 was merged with the new DWS Concept DJE Responsible Invest. The historical track record of

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 5.00%, he has to spend a one-off amount of Euro 50.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

DWS Concept DJE Responsible Invest LD

Investing responsibly in equities and bonds

Investment Approach

DJE works with MSCI ESG Research, a leading international provider of environmental, social and governance (ESG) analysis and ratings. The investment universe is examined on the basis of ESG filters. The fund management of the DWS Concept DJE Responsible Invest analyzes the closer selection qualitatively and invests in what it considers to be the most promising ESG leading stocks. Excluded are companies that violate United Nations regulations on human rights, labour rights and environmental protection or that generate more than 5% of their sales through weapons, gambling, nuclear energy, power plant coal or genetically modified seeds. On the equity side, the focus is on companies that have a positive impact on society and the environment. On the bond side, the fund invests primarily in "green bonds", i.e. bonds issued by companies that meet ESG criteria. Investment in government bonds is not the focus of attention, but is possible, provided there are no exclusion criteria such as high corruption, lack of freedom of the press or weak civil rights.

The three components of sustainability: ESG

The evaluation of MSCI ESG Research can not be displayed here for legal reasons.

Opportunities

- + Profit from the long-term investment trend Sustainability
- + Experienced fund manager with an approach based on fundamental, monetary and market analysis (FMM), enhanced by ESG filters
- + Participation in the growth opportunities of the equity and bond markets - no fixation on a region or a Country
- + Ongoing adjustment of the portfolio to the expected market conditions for strategic risk diversification

Risks

- No guarantee that securities of companies considered sustainable will perform above average
- Equities carry risk of stronger price declines
- Price risks of bonds with rising interest rates
- Currency risks due to foreign share
- Country, credit and liquidity risks of issuers

Fund Manager

Richard Schmidt

Responsible Since 01/07/2019

Richard Schmidt joined DJE in 2019. He has many years of experience in multi-asset fund management and manages the DWS Concept DJE Responsible Invest. He is also Head of Portfolio Management Institutional Clients and responsible for a number of institutional mandates.

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

Monthly Commentary

The stock markets in Europe and North America performed well in May and were able to largely offset the losses from the previous month. The main driver behind this positive development was once again market expectations that the doves could prevail over the hawks in monetary policy. Weaker labour market data eased concerns that the US economy could overheat. In addition, US inflation fell from 3.5% to 3.4% in April, while core inflation (excluding energy and food) fell from 3.8% to 3.6% - both year-on-year. This rekindled hopes of interest rate cuts by the Fed before the end of the year, especially as the markets have firmly priced in a key interest rate cut by the European Central Bank in June. However, the rally on the stock markets began to stutter around the middle of the month. This was due, among other things, to a rise in inflation in the eurozone from 2.4% to 2.6% and a jump in the Purchasing Managers' Index for the manufacturing sector in the eurozone from 45.7 to 47.3 points. The markets then revised their interest rate expectations. The bond markets reacted very differently to this. In Europe, yields on high-quality government bonds rose slightly. At 2.66%, 10-year German government bonds yielded 8 basis points higher than in the previous month. In contrast, the yield on their US counterparts fell by 18 basis points to 4.50%. In this market environment, the DWS Concept DJE Responsible Invest rose by 2.04%. The vast majority of sectors on the global equity market performed positively. The strongest results came from the technology, utilities and insurance sectors. By contrast, the automotive, travel & leisure and energy sectors ended the month of May in negative territory.
